

Registration Details:

The Athens Soccer Academy will be hosting a **SUMMER** Soccer Clinic for any interested soccer player both new/veteran. There will be **ONE morning 3-hour** session for 5 consecutive days. The clinic will be emphasizing the Athens Soccer Academy curriculum and highlighting the programs mission:

It is the mission of the ASA to bring a high level of technical and tactical soccer training to the players. In addition, we believe that developing the entire person, as an individual will make them a more successful person and player. It will be the mission of this club to assist each player in the development of himself or herself as a person who displays character, leadership, discipline and respect.

Expert guidance will be provided by Penn State University coaching staff (Coach John Perente and Dan Peritano) and the Athens Soccer Academy coaching staff (Coach Lezak, etc.). Program will be emphasizing skills that can be carried over to any soccer program and will be open to the general public. We are looking for a variety of players and there are no requirements for ability/skills.

U8: A fun introduction to soccer. A foundation of our program in a well-paced environment using fun game like activities. We also utilize small-sided games. Smart soccer will have coed groups that focus on developing soccer skills, fun and sportsmanship.

U10: Continued development of technique and soccer skills and introduction to individual and small group tactics. Again using game like fun activities. Included in the program will be fast footwork training.

U12-14+: Player's benefit from advanced technical and tactical training. Emphasis is placed on training and execution of soccer techniques and tactics under pressure of an opponent and game conditions. Specific position training that features defending, midfield play and goal scoring are part of the Athens Soccer Academy program.
